

# HunterLab

## HunterLab Web Seminar

HunterLab Web Seminars are one hour live Internet presentations by a Color Measurement Specialist. The presentation will focus on the key elements you need to know to make effective color measurements of your products. Two different seminars are being offered, **Basic Color Theory** and **EasyMatch® QC Operation**. Notes in PDF format will be e-mailed to you before the event so that you can print a hard copy prior to the presentation. Follow-up questions by telephone or e-mail are accepted up to one month after the presentation.

**Basic Color Theory** provides a course in fundamental color and applications theory and how it relates to the color and appearance measurement of the client's products.

**EasyMatch® QC Operation** will explain the features and best practices with HunterLab's NEW EasyMatch QC Software package. Upgrade issues from HunterLab's Universal Software® will be discussed, as well as the EasyMatch QC capabilities.

Please complete the following registration form and fax it to 703-471-4237. One registration per person. A confirmation of registration with further information on our web seminar will be e-mailed to you.
