

SOFTWARE VALIDATION STATEMENT

HunterLab's ISO 9001:2015 program details the following requirements for software projects:

- Establishment of performance requirements
- Creation of a project plan
- Development and approval of program requirements
- Design
- Coding
- Design review and approval
- Code archivals
- Test plan development (including requirements verification, general quality and performance verification [color calculation and data management and presentation], and sensor interface and performance verification)
- Testing (including requirements verification, general quality and performance verification [color calculation and data management and presentation], and sensor interface and performance verification)
- Documentation and production release.

EasyMatch QC Versions 4.0 and Above Satisfy These Requirements.
